Seeding Alfalfa and Pasture

Although we are "knee-deep in June," it won't be long until alfalfa and pasture seeding time will be here. Now is the time to get ready for successful late summer and fall seeding. Have the soil tested, apply needed lime, decide on the mixture to use and have the fertilizer and seed on hand in advance of seeding time.

Embarrassed Shopper

Bucklin, Kan.- The covered dish luncheon of Bucklin's Helping Hand Club turned out to be poor pot luck for Mrs. Zelma Nealy.

KNOW THE WEATHER

By E. H. Sims

Is it true that the higher the clouds, the harder the rain—as the old saying goes?

The height of the clouds above usually has little to do with the rainfall at a certain point below. In summer clouds usually build up to great heights. At the Equator, they are higher than at the poles.

The thunderstorm, which is a high cloud, often produces very heavy rain, whereas the lower stratus, which are typical of a cold winter warm front, more often produce a lengthy rain, perhaps extending for several years.

However, the highest clouds are ice clouds, the cirrus clouds. And they produce little or no precipitation. So, the old saying does not hold true as a weather clue.

Artic Road Plan Advanced

Ottowa.- Work on a $21,000,000 program to build roads linking the Canadian Artic to the south is under way. Such roads are believed to be vital if Prime Minister John Diefenbaker's "vision" of a thriving North is to be turned into reality.

The Artic and sub-Artic regions are to be subjected to an intensified survey this year. In the meantime, however, the routes of a few of the projected highways in the Yukon and Northwest Territories have been determined, and construction work has begun.
